

R E M A R K S

Regarding claim 1, it now recites "'A centrifuge'" instead of "'A gas centrifuge'". Also, the change suggested by Examiner has been adopted. Therefore, claim 11 is believed free of '112 objection, and is urged to be allowable. Claim 2 has likewise been amended to delete "'gas'" immediately prior to centrifuge. Allowance of claim 2 is believed in order.

A call from Examiner to discuss these and other appropriate wording changes, is invited, to expedite prosecution.

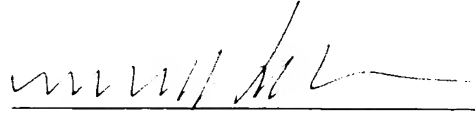

Claims 28, 29, 33, 35 and 36 have also been amended along lines suggested by Examiner, and are urged to be allowable.

Claim 34 now includes vanes to receive and be rotated by fluid flow in the system, with turbine effect. (Note "'fluid'" is either a liquid or a gas, or both). Claim 34 adds sub-paragraph d) control, not found in claim 32, so that 34 is not a duplicate of 32. Also, claim 34 does not appear to depend from 33.

In view of the above changes and argument, allowance of all remaining claims is believed in order.

Serial No. 10/087,917

Respectfully submitted,

A handwritten signature in dark ink, appearing to read 'William W. Haeffliger', written over a horizontal line.
